

EDUCATIONAL TRIP TO BIRSA MUNDA BIOLOGICAL PARK

"All work and no entertainment make jack a dull boy." After a series of serious intellectual activities Don Bosco School, Kokar organized a day of educational trip for relaxation and rejuvenation.

On the 22nd of October 2022 at 9:00 a.m. the Class XII Biology students under the guidance of the Class teacher Mr. Preet Prakash set out for 'Birsa Munda Biological park'. It is about 30 km away from the state capital Ranchi. The journey from Don Bosco school to the park was very exciting and entertaining. As the school bus picked up the speed towards the exciting destination the students looked through the window and enjoyed the beautiful scenery along the highway.

The hour became interesting, the day became exciting, and the moments gathered momentum of enjoyment as all queued up in front of the park gate. The teacher provided a field worksheet for each student to explore and write. As the students entered the park at first the students had a glimpse of lofty trees and a magnificent forest. Students witnessed the diversity of birds, tigers, and lions in small enclosures, deer in the open fields, huge elephants in the barricades, snakes in the artificially made holes, and many other animals.

At 1:30 pm the students had their lunch in the park and returned to school. The students were able to comprehend the difference between in-situ conservation and ex-situ conservation of biodiversity and the significance of biodiversity.
