

## SCIENCE CLUB

The Science Club is a platform for students to realize their scientific skills, knowledge and fulfil their quest in doing science activities for which they do not get opportunities within the curriculum framework. The Club will help in the development of scientific attitude, and develop genuine interest in science and scientific activities, supplement the work of the classroom, the laboratory and the syllabus. It will bridge in-school and out-of-school learning. By giving the Club members a supportive environment to explore science, it will foster the development of skills, such as experimentation, critical thinking, and problem solving and make the students more confident learners. Science club will make learning science a joyful event.
